Course Overview

Oil and gas operation is a hazardous industry and people around the world who work onshore or offshore need specialist skill to perform their responsibility.

This new qualification focuses on the principles of process safety management helping those working in the industry to fulfil their workplace obligation in line with global best practice.

QRSM International, a leading accredited provider for NEBOSH, IOSH & CIEH courses has recorded another landmark recently by becoming the first and so far the only in Africa to secure accreditation from NEBOSH to deliver this key Oil & Gas Operation qualification across the globe.

Who the Course is for

The Certificate is for managers, supervisors, appointed health and safety advisers & officers, non-safety specialists with health & safety responsibilities & who need grounding & globally recognised qualification in oil and gas operation either onshore or offshore.

Learning Outcomes

After successfully completing the course, participants would have good understanding of the following areas:

- The hazards inherent in the extraction, storage, and processing of raw materials and products
- Hydrocarbon Process Safety
- Fire Protection and Emergency response in Oil and Gas and connected Industry.
- Logistics and Transport Operation.

Certification

Delegates are awarded a Certificate by NEBOSH on successful completion of two 2-hour written exams.
